

# **PELTON MINERALS CORPORATION**

## **NEWS RELEASE**

March 13, 2026

CSE SYMBOL: PMC

OTCQB Symbol: PMCCF

### **Peloton Clarifies Certain Assay Results**

London, Ontario – Peloton Minerals Corporation (“Peloton” or the “Company”) (CSE Symbol: PMC; OTCQB Symbol: PMCCF) is issuing this clarification regarding certain assay results previously reported in its news release dated January 28, 2026.

Following an internal review of the analytical data and disclosure, the Company determined that the **cesium (Cs)** assays reported in the release were made in error. The assays attributable to cesium (Cs) were in fact the **cerium (Ce) assays**. The Cesium (Cs) assays in fact range from 1 part per million (“ppm”) to 70 ppm with an average of 16.7 ppm across all four drill holes.

This clarification relates solely to the inadvertent reversal of the cerium and cesium assays in the original disclosure. The **rubidium (Rb)** and **lithium (Li)** values reported in the original release were transcribed and reported correctly and remain unchanged.

The Company has reviewed its disclosure procedures and will implement additional verification steps to ensure consistency between laboratory analytical reports and public disclosure.

For further information, please visit the Company’s website at [Pelotonminerals.com](https://www.pelotonminerals.com) or contact:

**Edward (Ted) Ellwood, MBA**
